Product Registration - Guidance for Technical Assessors

BULLETIN 001 (11/1/22)

TOPAS 2130 – this specification will be amended when new specifications are created. You are advised to note the version you are using and ensure it is the latest version which can be found on the TOPAS website.

TOPAS 2516 transfers to TOPAS 2541

Where a Product was registered under TOPAS 2516 but is a Vehicle activated VMS then the Product may be transferred to 2541 provided that the additional requirements of TOPAS 2541 are evidenced in a Technical File which will require a full technical assessment. Applicants may use an existing TOPAS 2516 Technical File with additional elements included, but this must confirm compliance to all current requirements of TOPAS 2541.

Specification Reviews
