BULLETIN 005 (22/07/22)

Re :CE/CA Marking

Please note that it is still the intention of the UK Government that products must have CA marking for use in the UK from 31st December 2022.

Therefore, final products requiring applicable marking under UK law, as provided by legislation or Annex ZA to a specified standard, should be CA marked. It is acceptable for products to be CE and CA marked, but evidence of CA marking should be provided. This will be a TOPAS requirement when the law is enacted.

Please advise applicants of this requirement, which will come into force on January 1st 2023 for products new to market. They should seek confirmation of the terms of this requirement through the gov.uk website.

This requirement for products under the European Directives for CE marking are:

- Electromagnetic Compatibility
- Low Voltage
- Radio Emissions
- Construction Products Regulations

These Directives have been commuted into UK Law as follows and CA marking will be reference to:

- Electromagnetic Compatibility Regulations 2016 (SI 2016 No 1091)
- Low Voltage Electrical Equipment (Safety) Regulations 1989 (SI 1989 No 728)
- Radio Equipment Regulations 2017 (SI 2017 No 1206)
- Construction Products Regulations 2013 (SI 2013 No 1387) As amended by the Withdrawal Agreement.
- And remain in force following Brexit.

END
